Professional

- JAVA
- HTML
- CSS
- JavaScript
- Python
- C/C++

Software

- MS office
- Atom
- VS Code
- Github

CONTACTS

- simark8640@ gmail.com
- 9131241430

PROFILE

I am learning to be a web developer, and right now, I'm really focused on getting good at Data Structures and Algorithms. These are like the building blocks for solving problems in web development. I want to follow a clear learning path to become a full-stack developer ready for the real world. By getting the hang of Data Structures and Algorithms first, I believe I'll be better at solving tricky problems and creating strong web applications.

WORK EXPERIENCE

SIMPLE HTML PORTFOLIO | FIRST WEB PROJECT

This is my first Project which I created using only HTML
https://github.com/SimarKochar/html-portfolio

SIMON GAME | FRONT END PROJECT

Created a web version of simon game using HTML, CSS and JavaScript
https://github.com/SimarKochar/SimonGame/tree/gh-pages

DRUM KIT| FRONT END PROJECT

Created a drum Kit website using HTML, CSS AND JS
https://github.com/SimarKochar/DrumKit/tree/SimarKochar-patch-1
